

AI ENGINEER CAREER ROADMAP

Student → AI Engineer | Timeline: 3 Months | Generated using Chain-of-Thought Reasoning

■ CURRENT POSITION

■ Status: Student

■ Skills: React.js · Web Dev · Math / Statistics

Skill Area	Status	Priority
Python Programming	■ Missing	■ Critical
ML / Deep Learning	■ Missing	■ Critical
LLMs & Prompt Eng.	■ Missing	■ Critical
AI APIs (OpenAI...)	■ Missing	■ High
Data Structures	■ ■ Partial	■ High
React (AI UI)	■ Strong	■ Leverage
Math / Statistics	■ Strong	■ Leverage

■ RECOMMENDED LEARNING PLAN

Month	Focus	Resources
M 1	Python + ML Foundations	CS50P, fast.ai Part 1
M 2	Deep Learning + LLMs	fast.ai Part 2, HF Course
M 3	AI APIs + Portfolio	OpenAI Docs, LangChain

■ SUGGESTED PROJECTS

AI Chatbot (React + OpenAI API)

Leverages your React skills + AI

Month 2

Resume Analyzer Tool

NLP + PDF parsing, high demand

Month 2

AI Image Caption Generator

Vision models, great for portfolio

Month 3

LangChain RAG App

Trending skill employers seek

Month 3

Month 1

- Complete Python crash course (CS50P)
- Finish NumPy / Pandas basics
- Build first ML model (Sklearn)
- Commit daily to GitHub

Month 2

- Complete fast.ai deep-learning course
- Launch AI Chatbot project
- Study Hugging Face Transformers
- Build Resume Analyzer & deploy

Month 3

- Master LangChain + RAG pipelines
- Build 2 polished portfolio projects
- Publish 3 LinkedIn posts about AI
- Apply to 20+ AI Engineer roles

■ NETWORKING STRATEGY

LinkedIn: Post weekly AI project updates & learnings

GitHub: Push code daily — green squares = credibility

Twitter/X: Follow: @karpathy, @sama, @xlr8harder

Discord: Join Hugging Face & fast.ai communities

Kaggle: Compete & comment to build reputation

■ IMMEDIATE NEXT ACTIONS

- Install Python + VS Code today
- Start CS50P (free, Harvard) — Week 1
- Create GitHub profile & pin projects
- Optimise LinkedIn with 'AI Engineer' headline
- Join Hugging Face Discord community
- Set daily 2-hr deep-work coding block
